

Friends of Jackson County Conservation 2018 Native Plant Sale—Plant Details

Seed Packets

- ♦ Seed packets will contain at least 100 seeds, but most will contain a lot more.
- ♦ All seeds can be planted immediately except common milkweed. Milkweeds require a cold stratification (can easily be done in a fridge) for 30 days before they are ready to plant; we will provide detailed instructions.
- ♦ Tips for establishing native wildflowers: eliminate weeds before planting; optimal time for spring seeding is mid-May to mid-June; plant seed no more than one-quarter inch deep in firm soil; keep the topsoil moist for 3-6 weeks after planting to enhance germination. Water it if you don't receive at least 1/2" of rain each week in the first year.

Live Plants

- ♦ Live plants from nursery will come as small plugs; cells are 5" deep x 2" wide at top. Nodding onion from our garden will be a cluster of bulbs.
- ♦ Tips: remove plants from container as soon as possible and water thoroughly. Plant in the ground or a larger pot. Keep area around plants weed free, especially during the first growing season. Make sure the plants do not go dry for the first 3-6 weeks; water deeply; water throughout the first year.

<u>Butterfly Milkweed</u>	<i>Asclepias tuberosa</i>
Plant Spacing	1-3'
Sun Exposure	Full sun or part shade
Soil Moisture	Medium to Dry
Height	2 feet

<u>Meadow Blazing Star</u>	<i>Liatris ligulistylis</i>
Plant Spacing	1-2'
Sun Exposure	Full sun to part shade
Height	5 feet
Soil Moisture	Medium

<u>Anise Hyssop</u>	<i>Agastache foeniculum</i>
Plant Spacing	12-18"
Height	3'
Sun Exposure	Full sun or part shade
Soil Moisture	Medium, medium-dry

<u>Nodding Onion</u>	<i>Allium cernuum</i>
Plant Spacing	4-8"
Height	18"
Sun Exposure	Full sun or part shade
Soil Moisture	Moderately wet to mod. dry

<u>Common Milkweed</u>	<i>Asclepias syriaca</i>
Sun Exposure	Full sun or part shade
Soil Moisture	Medium-wet to Dry
Color	Pink
Height	3 Feet

<u>Mountain Mint</u>	<i>Pycnanthemum virginianum</i>
Sun Exposure	Full sun or part shade
Soil Moisture	Wet to Dry
Color	White
Height	3 feet

<u>Wild Bergamot</u>	<i>Monarda fistulosa</i>
Sun Exposure	Full sun to part shade
Soil Moisture	Medium-wet to Dry
Bloom Time	July—Sept
Color	Purple
Height	4 feet

<u>Wild Garlic</u>	<i>Allium canadense</i>
Sun Exposure	Full sun, partial, shade
Soil Moisture	Medium-wet to dry
Color	Pink
Height	18"

<u>Heath Aster</u>	<i>Symphyotrichum ericoides</i>
Sun Exposure	Full sun, part sun
Soil Moisture	Medium to dry
Color	White
Height	2 feet

<u>Purple Coneflower</u>	<i>Echinacea purpurea</i>
Sun Exposure	Full sun, part shade
Soil Moisture	Medium wet to medium dry
Color	Purple
Height	4 feet

<u>Smooth Blue Aster</u>	<i>Symphyotrichum laeve</i>
Sun Exposure	Full sun, part shade
Soil Moisture	Medium wet to medium dry
Color	Blue
Height	4 feet

<u>Prairie Dropseed Grass</u>	<i>Sporobolus heterolepis</i>
Sun Exposure	Full sun, part shade
Soil Moisture	Medium-wet to dry
Height	3 feet

<u>Indian Grass</u>	<i>Sorghastrum nutans</i>
Sun Exposure	Full sun, part shade
Soil Moisture	Medium to dry
Height	6 feet

Seed Packet order deadline is March 27

Live Plants while supplies last

- ⇒ Seed packets will be ready to pick up on/after **Wednesday, April 11** at the Hurstville Center
- ⇒ Live plants will be ready to pick up **sometime in May** at the Hurstville Center
- ⇒ Questions, call (563) 652-3783
